Company Capabilities

Radiological & Environmental Engineering: CABRERA provides a broad range of radiological engineering services/capabilities including: MARSSIM survey design & implementation, regulatory interface/compliance support & permitting/licensing, radiation safety development & support, spatially-referenced interior & exterior radiation surveys, in situ analysis using portable high-purity gamma spectroscopy, risk assessment/communication (DCGL, RESRAD/D&D modeling) and dose reconstruction. NAICS: 562910

Radiological & Environmental Engineering: CABRERA provides expert environmental engineering solutions and has extensive experience providing regulatory solutions leading to site closure. Our engineers and scientists provide solutions under MARSSIM, CERCLA, RCRA and other state and federal regulations. CABRERA's remedial engineering and design services include: CERCLA, RI/FS, decision documents & remedial design, design-build remediation services, environmental baseline & historical site assessment surveys, civil works & utility network mapping & characterization, web-enabled GIS & CAD reporting, environmental risk assessment and groundwater sampling & monitoring. NAICS: 562910

Environmental/Radiological Remediation: CABRERA offers full-spectrum environmental and radiological remedial construction services. Our remediation services include: facility decontamination, decommissioning & demolition, ground penetrating radar (GPR) & electromagnetic (EM) technology, hazardous material fixation, stabilization & solidification, radioactive waste site remediation and precision soil excavation. NAICS: 562910

Radioactive & Mixed Waste Management: CABRERA provides full-service radioactive and mixed waste management services from in situ characterization to segregation, packaging, transport and disposal. CABRERA's radioactive and mixed waste management services include waste characterization & assay, Waste Acceptance Criteria (WAC) profiling, transportation, planning, packaging & disposal, on-site treatment of hazardous & radioactive waste and waste brokering. NAICS: 562910

MEC Remediation & Military Munitions Range Support: CABRERA offers an array of munitions response and range support services. CABRERA'S range support activities focus on the integration of our remote sensing technologies and remedial construction expertise to facilitate cost-effective range-safe and range-clean operations. Services include; mixed radioactive & MC material management, demilitarization & disposal, range management, maintenance & support, ordnance demilitarization, evaluation / decontamination / demolition of explosives-contaminated buildings, equipment and utility lines, removal / treatment/disposition of explosives-contaminated soil and groundwater, and clearance of range targets, unexploded ordnance and MEC. NAICS: 562910

Company Certifications

SBA Certified Small Disadvantaged Business; SBA 8(a) Certified Program Participant; U.S. Nuclear Regulatory Commission Broad Scope License to perform decontamination/decommissioning/waste handling/shipping activities in all 50 states. Professional Certifications: Professional Geologists (PG), Professional Engineers (PE), Certified Health Physicists (CHP), Certified Engineers-in-Training (EIT), Certified Waste Brokers, Certified Safety Professionals (CSP) and Certified Industrial Hygienists (CIH).

Air Force Protege Capabilities

Delphi Research Inc.

ADDRESS INFORMATION

3954 Murphy Canyon Road
Suite D-201
San Diego CA 92123-4420

Company Capabilities

Information Assurance (IA) Engineering (NAICS 541330) - Information Assurance and Cyber Security services focus on preventing or mitigating threats to computer networks vital to defense and critical infrastructure. Delphi provides IA enterprise risk management engineering focused on better integrating physical and IT security and identifying and mitigating vulnerabilities. We certify and accredit major systems and also assess smaller, less mission-critical systems for security vulnerabilities; provide IT planning and policy management for improving security; and provide continuous monitoring of security environments, including systems, networks, and physical elements.

Custom Software Application Development (NAICS 541511) - Delphi offers a wide range of software design and development services to assist customers in deploying applications and system software. We provide complete software life-cycle and engineering support services. We have the capability to develop systems on virtually any platform using commercial and open source tools. All work adheres to processes developed by the Software Engineering Institute (SEI). Our engineers are trained in Personal Software Process (PSP), Team Software Process (TSP), and CMMI. This assures our customers that the system being developed has quality built in from the beginning and that steps are taken to assure quality and schedule estimates are accurate.

Software Assurance and IV&V (NAICS 541511) – Traditional IT security measures have focused largely on network and perimeter-based protection, not on the application code itself. And while most development teams test their applications for functionality, performance, and integration, the lack of security testing early in the development process has serious consequences. We provide an automated and comprehensive process to discover and analyze security risks in software applications so that flaws in both legacy software and new code development can be identified. We provide application security technology and services, offering automated processes to identify risks, coupled with services to help correct those identified security gaps.

IT Server Consolidation and Virtualization (NAICS 541512) - IT Server Consolidation services focus on cutting costs and improving network cyber security. We assist customers in consolidating the number of email servers across an enterprise, the number of file and print servers, data center consolidations and enterprise license arrangement. We provide infrastructure consolidation and implementation of a flexible virtual server environment, helping you maximize use of your server resources. Virtual server environments consist of a pool of multi-OS, dynamically sizeable virtual servers; each can grow or shrink based on corporate objectives and business needs.

Company Certifications

Software Engineering Institute (SEI) certified Personal Software Process (PSP) Engineers; SEI certified PSP Instructor; SEI certified Team Software Process (TSP) Launch Coach.

Company Capabilities

High-technology radar and video distribution products for the Navy's Advanced Sensor Distribution Systems to include AEGIS Cruiser and Destroyer, LHA, CVN, and LHD class vessels. International customers include Australia (FFG Upgrade, 8 ship sets of equipment), Norway (New Frigate Program, 5 ship sets for AEGIS class), and Korea (3 FFG class vessels). NAICS: 334511.

Innovative test equipment and associated software for both production and repair programs, such as Global Hawk, Joint STARS, B-1B, KC-135, C-17, and the F-15E aircraft. NAICS: 334515.

Avionics and electronics for aircraft such as the F-18 E/F, Airborne Laser, AH-64A Apache, B-1B, and KC-135. NAICS: 336413.

Space-flight power control electronics for DOD's Defense Support Program (DSP) and SBIRS-Low, NASA's Earth Observing System (EOS) and the International Space Station, and joint Government programs such as National Polar-orbiting Operational Environmental Satellite System (NPOESS). NAICS: 336419.

Research and development, prototype design/manufacture, engineering services for aerospace, maritime, and industrial applications. NAICS: 541710, 541512, 541330.

Company Certifications

Small Disadvantaged Business (Source: Small Business Administration)
ISO 9001:2000 (Source: National Quality Assurance)
AS9100, Revision A (Source: National Quality Assurance)

Company Capabilities

Research and Development in the Physical Engineering and Life Sciences

Testing Laboratories – Laboratory analysis of air, water and soil

Remediation Services including sampling plan development, sample collection/management, analytical and investigative characterization.

Facilities Support Services

Hazardous Waste Treatment & Disposal

Company Certifications

Integrated Solutions & Services is a Small, Woman Owned, Native American, SBA-Certified Hubzone Company with professionals such as Professional Geologists (PG), Certified Hazardous Materials Managers (CHMM), and Certified Health Physicists (CHP).
